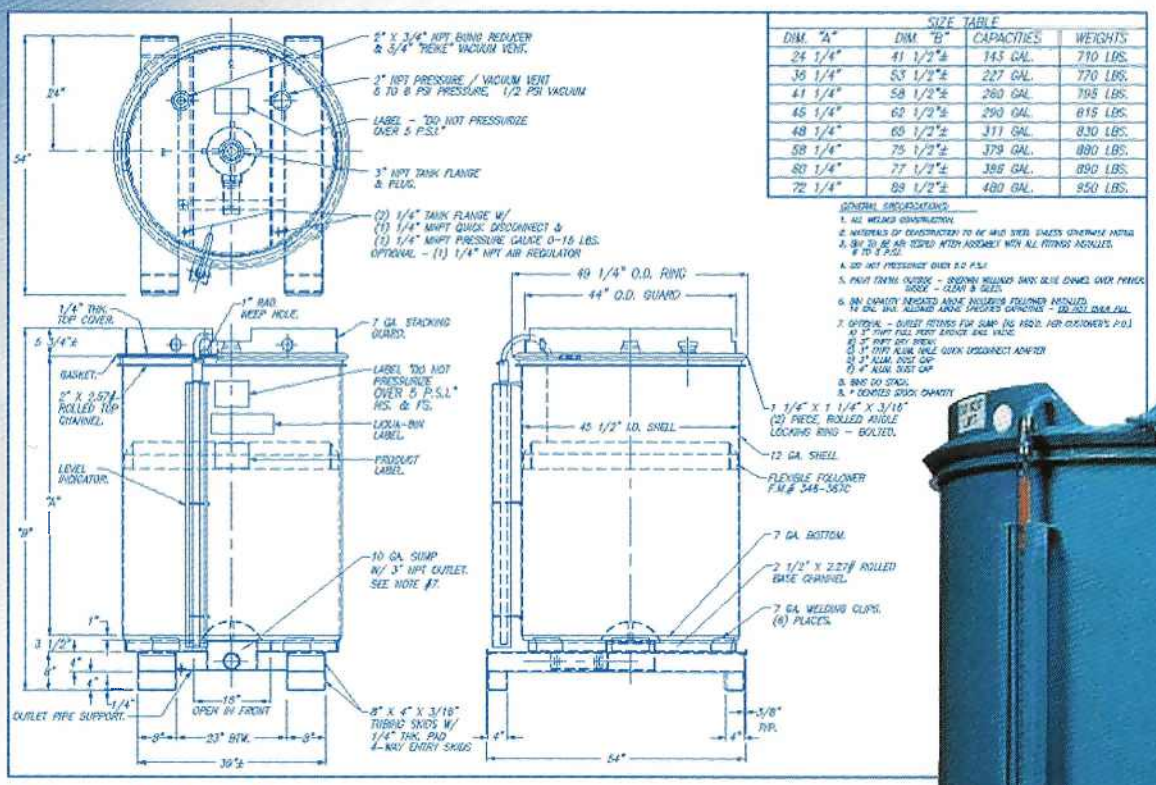
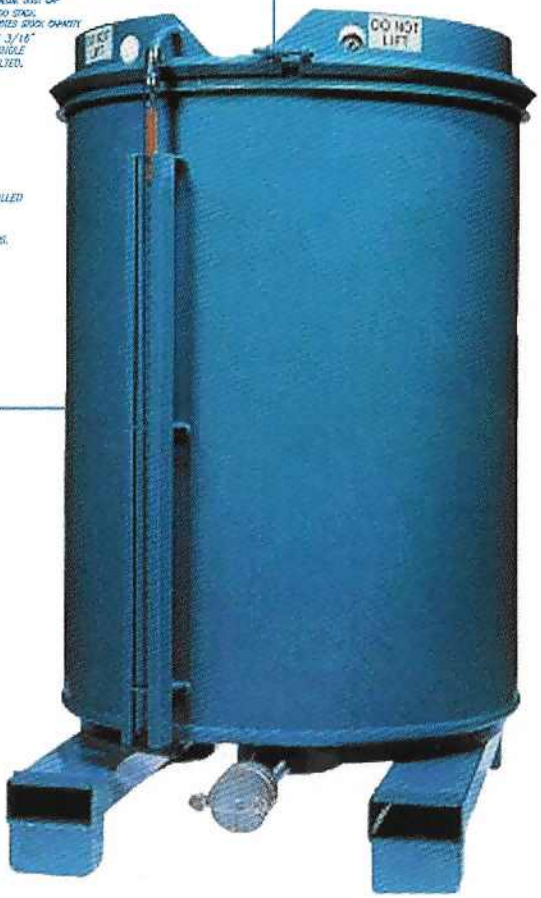
THE HOOVER FOLLOWER PLATE
Intermediate Bulk Container (IBC)

The Hoover Follower Plate Intermediate Bulk Container (IBC) is excellent for storing or transporting viscous products such as ink, grease, mastic, wax and peanut butter. The unique design utilizes air pressure to apply force onto a follower plate. The follower plate forces the viscous product in a uniform manner to the center discharge, wiping the inner sidewalls of residual material and maximizing product yield. Additionally, controlling the movement of viscous products prevents cavitation, reducing pump maintenance.





Specifications:

- **Standard size is 379-gallons, but we will build to suit**
- **Available in carbon steel, stainless steel, or aluminum**
- **Level indicator**
- **Removable top with pressure/vacuum vents, 3" bung and plug, pressure gauge, 1/4" quick connect air fitting**
- **3" bronze ball valve, quick connect with cap**
- **4-way fork entry**
- **Weld finishes ground smooth; other finishes available upon request**
